In Colorado, anyone engaged in the business of applying or supervising the use of pesticides in exchange for payment is required to be licensed as a Commercial Pesticide Applicator by the Colorado Department of Agriculture (CDA). Private pesticide applicators must be licensed by the CDA before they may purchase, store, or apply restricted use pesticides on land they own or lease.

The Front Range Pest Management Workshop is conducted annually to provide all licensed pesticide applicators the opportunity to receive the continuing education credits required to maintain their license with CDA.

This program is for pesticide applicators who are already licensed. If you do not have a current pesticide applicators license, you must take a test and be licensed with the CDA before continuing education credits can be issued.

The Wednesday morning program meets all continuing education credit requirements for private pesticide applicators, as well as the core categories for commercial pesticide applicators. Commercial Applicators are required to attend additional one-hour sessions in each category for which they are licensed.

Continuing education credits are also available for NE (morning & Ag session only), KS, and WY.

CSU Extension programs are available to all without discrimination.

If you have a disability for which you seek an accommodation, please notify CEPEP at (970) 491-3947.
The morning session provides all the CECs required by the CDA for private applicators and all the core credits for commercial applicators.
